

Pet Overpopulation

If a girl kitten is not spayed, she can carry her first litter of kittens at 4-6 months old, and have 2 litters of kittens per year with about 6 kittens in each litter.

How a few cute kittens can
become a city, state,
nation and world of cats...

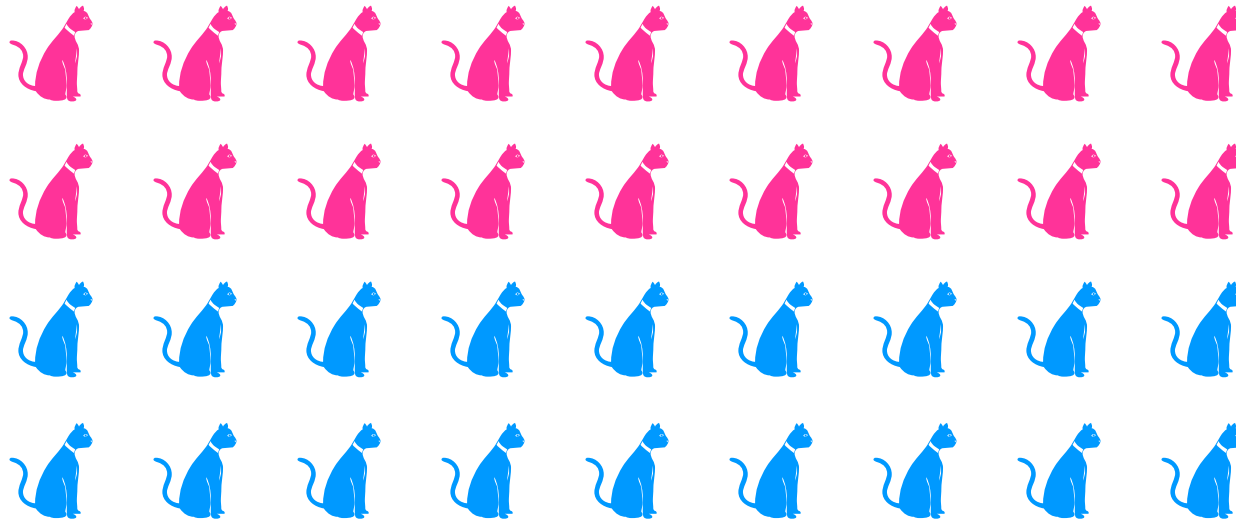

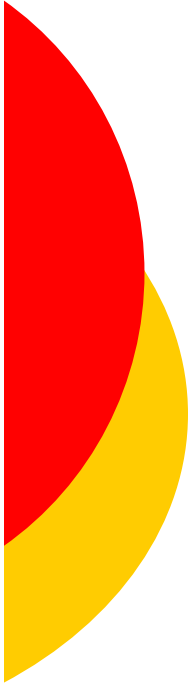

If the students in your class had 30
unspayed girl kittens they could make

- 360 more kittens (180 girls, 180 boys)
the first year.

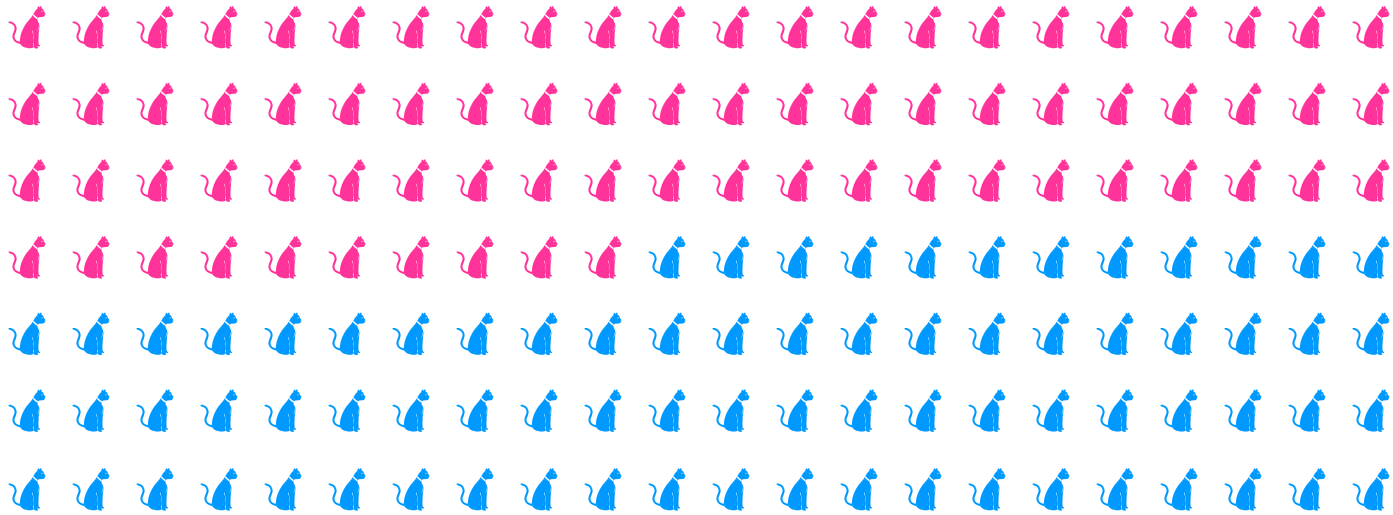

About the size of the town Sand City, California in Monterey County.

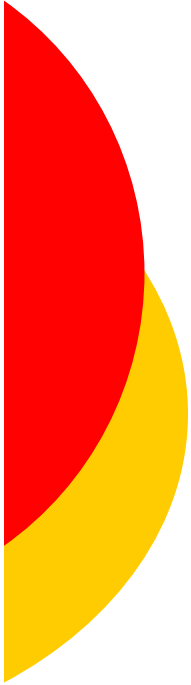

The second year, the 180 girl kittens + the 30 mama kittens soon have.....

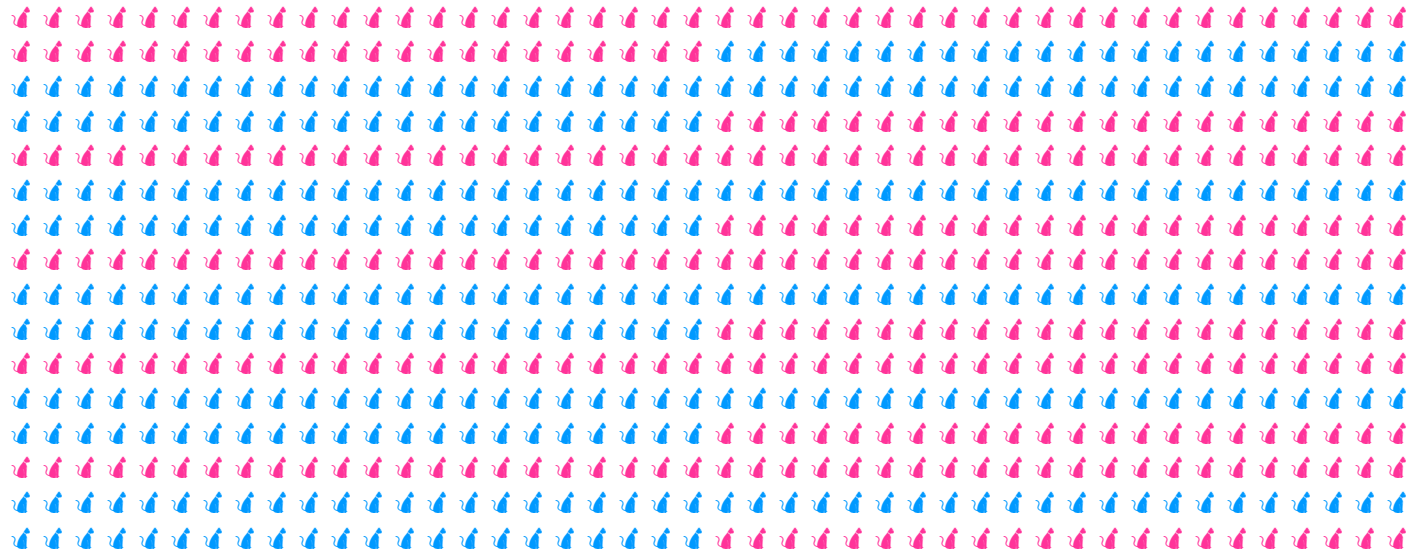

- 2520 more kittens (1260 boys and 1260 girls)
About the population of the town of Belvedere in Marin County, Ca.

The third year, the 1260 girl kittens + their
180 mama kittens + the original 30 mama
kittens soon have.....

17,640 more kittens (8,820 boys and 8,820 girls)
This is about the population of **Arroyo Grande**

The fourth year, the 8,820 girl kittens + their 1260
mama kittens + their 180 mama kittens + the original
30 mama kittens soon become.....

123,480 more kittens (61,720 boys and 61,720 girls)
This is the population of the cities of

Santa Barbara and Goleta added together.

There are so many that I cannot count them.

The fifth year, the 61,720 girl kittens + their 8,820 mama kittens + their 1260 mama kittens + their 180 mama kittens + the original 30 mama kittens soon become.....

864,360 more kittens (432,180 boys and 432,180 girls).

This is about the population of
the state of **Alaska or Delaware.**

HELP!

Things are out of control

The average cat lives to be 15-20 years old.

- How many more kittens can come from these original 30 cats?
- In 10 years there could be as many cats as there are people in all of North and South America .
- In 15 years there could be the over 5 trillion cats close to the number of people in the entire world.
- What about other cats that might be having kittens?
- Who will care for all of these cats?
- How can we control this?

**You can do your part to help control Pet Overpopulation
by spaying and neutering your pets**
